Course in Electrician –
Minimum Australian Context Gap
(10145NAT)

Candidate Information Kit

UEE30811 - Certificate III in
Electrotechnology Electrician

Congratulations on successfully completing a skills assessment conducted by a Trades Recognition Australia (TRA) approved Registered Training Organisation (RTO) in the technical component for the UEE30811 - Certificate III in Electrotechnology Electrician qualification and on being issued with an Offshore Technical Skills Record (OTSR).

A licence is required to work in all states and territories and an OTSR entitles the holder a provisional or temporary licence as an Electrician, subject to meeting other licencing requirements.

To achieve the full qualification for the Certificate III in Electrotechnology Electrician, Australian context training, which focuses on the relevant Australian content and standards, can only be undertaken in Australia. A period of supervised work experience in Australia is also needed before you meet the qualification requirements and can apply for a full licence.

The Minimum Australian Context Gap (MACG) training program will include:

- Gaining required skills and knowledge from a RTO.
- Completing work experience under appropriate supervision and recorded using an approved workplace recording system.
- Passing a compliance assessment that covers verifying the safety and compliance of electrical installation wiring and equipment including all the relevant and mandatory tests, in accordance with the relevant standards of the states and territories.

This information kit has been specifically developed to complement the trade skills offshore assessments conducted by TRA approved RTOs.

The kit provides guidance and relevant information regarding how to progress towards completion of the Certificate III qualification and issuance of the occupational licence, as well as other useful information you may need to know about the Australian Electrotechnology Industry and training sector.

Overview of the Process

STEP 1 - Provisional occupational licence/permit

The Onshore/Offshore Technical Skills Record (OTSR) lists the technical skills that have been demonstrated against the UEE30811 - Certificate III in Electrotechnology Electrician qualification. However, there is an 'Australian knowledge' gap that needs to be bridged to meet all the competency standard units comprising the qualification and to meet the full requirements of the UEE30811 qualification.

Australian Electrical Industry regulators have agreed to issue a provisional (restricted) licence upon presentation of an OTSR. This permit allows candidates to work in Australia under the supervision of an employer, while the 'Australian knowledge' component of each competency standard unit is completed.

The contact details for each Australian state and territory Electrical Industry licensing regulator is included in Table 1 overleaf.

Regulators will be able to advise you about any specific licensing requirements for that state or territory.

Table 1: Contact details of regulators for the Australian Electrical Industry and licensing requirements

State/Territory	Licensing authority	Mailing Address	Phone	website
New South Wales	Office of Fair Trading	PO Box 972 Parramatta NSW 2124	Tel: 13 32 20 or (02) 9895 0111 Fax: (02) 9895 0222 Email: Go to the website for the Online Enquiry Form	http://www.fairtrading.nsw.gov.au/ftw/Tradespeople/Home_building_licensing.page

STEP 2 - Find an employer

Once you have arrived in Australia you must find an employer. An employer can be found via a number of ways:

- Check the jobs sections of local newspapers
- Check employment websites
- Contact your local Employer/Employee Association
- Centrelink Job search

Table 2 lists the contact details for Electrical Industry Employer and Employee representative associations.

STEP 3 - Enrol at an RTO

Registered Training Organisations (RTOs) will view the OTSR as evidence of your prior learning contributing to the Certificate III qualification. Participating RTOs in each state or territory will deliver the identified MACG training to meet the qualification and, licensing requirements. This training is provided for a fee that is determined by the RTO.

A list of RTOs that deliver the Minimum Australian Context Gap Courses is available under 'Skills Migration' on the E-Oz website (www.e-oz.com.au) and on the Australian Government website (www.training.gov.au)

STEP 4 - Gap Training Course

The RTO will deliver the identified MACG training and collect evidence of your on-the-job experiences with an employer via the eProfiling system

The MACG training will cover:

- a) Required skills and knowledge for Australian standards
- b) Completing the work experience/performance requirements
- c) A final compliance assessment

a) Required skills and knowledge

To be delivered by the RTO and includes:

- Workplace Health and Safety (WHS)/ Occupational Health and Safety (OHS) in Australia
- Responsibilities in working in an Australian Competency Based Training (CBT) context
- Meet the reading, writing and numeracy indicators of skills/competencies in each competency standard unit
- Electrical Safe Working Practice inclusive of applicable local regulatory tests
- Multiple Earth Neutral (MEN) system
- Electrical Installation – Protection Methods and Devices
- Electrical Installation – Design and Equipment Selection
- Electrical Installation – Testing and Verification

b) Work experience/performance

To be undertaken, holding a 'provisional licence' with an employer in the workplace, with appropriate supervision and recorded in e-Profiling. Aspects to be addressed include:

- Meeting the language, literacy and numeracy requirements of each competency standard unit.
- Responsibilities of working in an Australian Competency Based Training (CBT) context
- Wiring and equipment installation in accordance with AS/NZS 3000_Australia/New Zealand Wiring Standards and related standards
- Multiple Earth Neutral (MEN) system
- Standards and codes of practice for working with electrical installations and equipment
- Verification and testing of installation wiring and equipment
- Local service and installation rules
- Workplace Health and Safety (WHS)/ Occupational Health and Safety (OHS) and environmental requirements

c) Final Compliance Assessment

Undertaking a final compliance assessment that is in accordance with the relevant regulatory and industry policy to cover:

- Verification of the safety and compliance of electrical installation wiring and equipment, including the relevant and mandatory tests in Australia and in accordance with the relevant requirements of the jurisdiction.

STEP 5 - Workplace Evidence

Australian regulators require evidence that broad experience has been gained on-the-job and require this evidence to be formally gathered and documented. The industry endorsed method of gathering this evidence is the eProfiling system.

eProfiling is an innovative electronic workplace skill development tracking system that records and reports on the work experiences of the learner. eProfiling works by regularly measuring the progress of a learner against industry agreed predetermined advisory targets directly linked to national competency standard units.

To register on the eProfiling (e-Log Book) system please contact the eProfiling National Office on 1300 477 808. For more information please visit the eProfiling website www.eprofiling.com.au.

Once you have registered, you will be issued an e-Log Book registration code and password to allow you to record the details of your work experiences on a weekly basis via the internet.

STEP 6 - Meeting the Full Qualification and Licence Requirements

Once you have successfully completed steps 1 to 5, the RTO will issue your Statement of Attainment and you will need to take it to the RTO that conducted your initial assessment and issued your OTSR. This RTO will then grant you the Certificate III in Electrotechnology Electrician (UEE30811).

However, in accordance with the latest Trades Recognition Australia (TRA) policy changes, should the Australian Context Gap Training RTO believe they have enough evidence to issue a full qualification outcome instead of a Statement of Attainment; then they may also grant you the Certificate III in Electrotechnology Electrician (UEE30811).

All states and territories license or register Electricians, and you will need to take your Certificate III qualification, provisional licence and e-profiling report back to the licensing regulator and apply for an Electrician licence.

Useful Contacts:

If you experience any difficulties undertaking any of the above steps, please contact the following organisations for assistance:
